INTRODUCTION

EcoFab offers a complete range of solutions for visual effects of the street that suits your architectural demand. We have a firm commitment of providing you with the most innovative solutions that perfectly align with your urban requirements, for creating public spaces that promote public health, happiness and well-being.

These solutions not only focus on adding value to the artistic taste of the street views but moreover to the urban scenery.

We offer Bollards and Tree Grates in not only Steel and Stainless Steel, but in GRP as well, for an optimum tree and soil protection.

Steel Stainless Steel & Glass Reinforced Plastic

Plants brighten up an environment by adding to it more freshness and crisp, while creating an eco-friendly atmosphere. Add a few Green Planters, and the whole urban elements and streetscape will come to life.

EcoFab has got commercial grade products that come in custom size and shape, both for indoor and outdoor, so you could use them anywhere you like.

Our product catalogue ranges from aesthetically beautified wood to extendable GRP and elegant metal.

GRP material makes these green planters ultra light, so if you don't like heavy pots, you could choose between the GRP planters as well.

As far as the quality is concerned, EcoFab planters are made to stay for a longer period of time.

Aesthetically beautiful, light-weight yet durable and corrosion resistant; that is how we define our EcoFab planters.

To give yourself more liberty of how your planters should look like, you can choose between any color from the RAL palette.

Our products are exclusively produced in the Kingdom of Qatar. We have intentionally made them light in weight that is why they are easy to transport and ensure a rapid delivery anywhere.

We use varied aesthetic approaches according to the needs and requirements of every client.

BENCHES

EcoFab has got just the right selection of outdoor benches for your taste. Our wide range of outdoor benches is available in different materials which include steel, stainless, glass reinforced plastic, and moreover wooden finished benches made out of stainless steel frame.

We at EcoFab strongly believe in preserving the natural essence of landscapes and streetscapes, that is why we offer a broad range of carefully designed benches that are rightly suitable for parks, and in the line for giving a glamorous look to more commercial sites like stadiums, convention centers, municipal parks, waiting areas for restaurants, family apartment complexes and retail centers.

These benches are a perfect blend-in for environments of other environments like mosques, schools, universities and street seatings.

All products we offer have a brush and mirror finish for the steel adding to their beauty in a stylish way.

AVAILABLE IN OUR STORES

- Plastic with glass reinforced quality
- 316 Grade stainless steel for outdoor usage
- 304 Grade stainless steel for indoor usage
- Iron with a protective zinc coating to ensure safety from rust and corrosion

WHAT SIZES ARE AVAILABLE?

We know that our valued clients have different requirements and needs, that is why we offer these materials in custom and geometric styles and sizes accordingly.

GRATES FOR TREES AND DRAINAGE

Trees and pedestrians alike require a certain measure of protection from each other, and other elements of urban life. Our decorative tree grates compliment surrounding aesthetics while providing protection and security to the tree, as well as providing a safe extension of the pedestrian walk way.

EcoFab tree grates can be customized in shapes and patterns of client choice. They are manufactured ensuring easy installation, aesthetic appeal, and material durability. Perforations in our tree grates allow smooth irrigation while protecting the roots, with an option for holding tree guards. Spotlighting options can also be enabled in tree grates for night vision and safety.

Available in all regular geometric shapes, custom shapes, and sizes with pattern as per client requirement

LITTER BIN

At EcoFab, we are mindful of the complete urban design needs in enhancing the value and livability of streets. We therefore have a line of litter bins that can enhance the environment and reduce littering with easy to use and handle litter bins.

These timeless and durable bins are ideal for demanding surroundings where safety and recycling matter the most. Designed for both outdoor and indoor use.

EcoFab litterbins are the right choice for parks, streets, and recreation grounds, as well as for offices, apssenger terminals, shopping malls, and other public buildings.

We can customize the waste bins according to your specification and need. You just have to give us a specification of what you need; once done, relax and let us do the math. The choice of color, design and shapes we will provide, will surely make you hold your breath.
